RE: Fiscal Year 2019 Funding Guidelines

After careful consideration and in a continued effort to maximize the impact Montana can have with Beef Checkoff dollars, the Montana Beef Council Board of Directors has set their strategic priorities for the 2019 fiscal year.

These strategic priorities will be important in achieving the Montana Beef Council's mission to protect and increase demand for beef and beef products through state, national and international promotion, education and research, thereby enhancing profit opportunities for Montana beef producers. Subsequent tactical planning and resource allocation will be based on the priorities.

In consideration of funding, the committee will review the written request to see that the intended purpose of the request fits within one or multiple strategic priorities and seeks to accomplish the mission of the Montana Beef Council. When developing your project/event, keep in mind the above strategic priorities to think through how your project/event could meet one or multiple areas.

Please note our tentative funding situation still exists due to the ongoing R-CALF v. USDA lawsuit and preliminary injunction. We encourage you to submit your requests and in the event we can fund your project, we will notify you as soon as possible. Feel free to call the office to discuss your ideas before submitting or if you have any questions. Montana Beef Council (406) 656-3336
